BENEFITS

- → Streamline your workflows through automation of repetitive tasks, personnel notifications, and smooth transitions between production phases.
- → Enhance operations with real-time plant and team monitoring, performance tracking, and goal setting.
- → Move to a paper-free environment by storing job records digitally, significantly reducing the need for physical storage.
- → Simplify prioritization by managing start dates, selecting appropriate lines of equipment, and determining product ship dates.

BUILD SPECS ARE VISIBLE DURING ASSEMBLY

MiTek

MiTek[®] PRODUCTION

Upgrade from MiTek® ShopNet to MiTek® Production for even more benefits.

- → Integrate your workflows seamlessly with the complete MiTek Software Suite, including MiTek[®] Structure and MiTek[®] Management[™].
- → A browser-based solution that supports unlimited users, ensuring one upgrade applies to all workstations.
- → Create an unlimited number of custom reports or utilize a library of pre-made report templates.
- \rightarrow Manage roofs, floors, and walls all within the same software application.
- → A consistent and customizable user interface across all workstations, simplifying training and operation for team members.
- → Includes quarterly product enhancements and consistent version updates to keep your software and facility on the cutting-edge.

The upgrade process typically takes around two weeks to complete for MiTek ShopNet users.

Pre-Launch

SOFTWARE DEMONSTRATION

- Receive a virtual demonstration of MiTek Production to preview its software capabilities
- Review next steps and expectations for the upgrade process

INTAKE FORM

- Fill out the intake form to describe your current processes and equipment
- Engage in a detailed discussion with the MiTek implementation team so they fully understand your workflows and the requirements of your upgrade

GAP ANALYSIS

MiTek team evaluates your current software to ensure it's fully equipped for seamless deployment

Launch

REMOTE DEPLOYMENT

MiTek Production software is installed remotely on your system by the MiTek implementation team

ON-SITE TRAINING

- MiTek works with you to finalize the installation settings, ensuring any additional setup tasks are completed as necessary
- MiTek provides training for your employees

Contact your MiTek Representative to get started.
